SAURABH DHUMANE

MERN Stack Developer
+91 – 888821972 | saurabhdhumneraje@gmail.com| Pune, Maharashtra | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

MERN Stack Developer with **4+ years of experience** in building scalable, secure, and high-performance web applications using **MongoDB, Express.js, React.js, and Node.js**. Strong background in RESTful API development, micro services-based systems, and database design. Experienced in full-stack development, agile methodologies, clean coding practices, and delivering enterprise-grade solutions for banking and insurance domains.

TECHNICAL SKILLS

Frontend: React.js, React Native, JavaScript (ES6+), Typescript, HTML5, CSS3, Bootstrap, Tailwind CSS
Backend: Node.js, Express.js, REST APIs, JWT Authentication
Databases: MongoDB, Mongoose, PostgreSQL, SQL Server (Relational DB concepts)
Architecture: MERN Stack, Microservices, MVC, RESTful Design, SOLID Principles
State Management: React Hooks, Context API
Tools & Platforms: Git, GitHub, Postman, VS Code
Methodologies: Agile, Scrum, SDLC, Sprint Planning, Code Reviews
Cloud & DevOps: AWS (EC2, S3 – basic usage), Docker (containerization), VPS Deployment (DigitalOcean Droplets), Linux Server Management

PROFESSIONAL EXPERIENCE

MERN Stack Developer | Time Dignitor Built Pvt Ltd., Pune
September 2024 - Present

- Developing scalable **full-stack web applications using MongoDB, Express.js, React.js, and Node.js**, focusing on clean architecture, reusable components, and maintainable code.
- Designing and implementing **RESTful APIs**, integrating third-party services, and ensuring secure authentication using **JWT and role-based access control**.
- **Deploying and managing applications on cloud and VPS environments**, including **AWS EC2, S3, and DigitalOcean Droplets**, using Docker containers and Linux-based server configurations.
- Participating in **Agile development cycles**, conducting code reviews, and supporting CI/CD deployments to ensure smooth and reliable production releases.

MERN Stack Developer | MindScape Technologies Pvt. Ltd., Pune
Jul 2022 – Aug 2024

- Developed and maintained scalable **full-stack web applications** using the MERN stack (MongoDB, Express.js, React.js, Node.js), delivering responsive company websites and e-commerce platforms with optimized performance and maintainable code architecture.
- Designed and implemented **dynamic admin and user dashboards** using React Hooks, Tailwind CSS, and reusable components, improving application responsiveness, user experience, and overall UI consistency.
- Implemented **secure authentication and authorization mechanisms** using JWT and middleware-based route protection to ensure secure access control across the application.
- Optimized database queries and backend logic in **MongoDB**, improving application performance and reducing response times for high-traffic pages.
- Collaborated with **UI/UX designers, QA engineers, and deployment teams** to deliver production-ready features and support **smooth deployments with minimal downtime** using Git-based workflows.

PROJECT EXPERIENCE

Project 1: Nopelt – AI-Powered Conversation Assistant (Mobile + Backend)

Description: Nopelt is a mobile application designed to help users quickly generate smart replies for real-life conversations and social media interactions. The platform provides scenario-based AI responses, allowing users to select situations and instantly receive context-appropriate replies, improving communication efficiency and user engagement.

Key Contributions:

- Designed and developed **RESTful APIs using Node.js and Express.js** to manage scenarios, generated replies, and user interaction data.
- Structured **MongoDB collections** for scenarios, response templates, user activities, and analytics tracking.
- Built the **mobile application using React Native**, enabling users to browse conversation scenarios and generate instant replies.
- Implemented **AI-powered response generation logic** to dynamically create contextual replies based on selected scenarios.
- Integrated **push notifications using OneSignal** to notify users about trending scenarios and app updates.
- Implemented **JWT-based authentication and secure API access** to protect user data and backend endpoints.
- Created **modular backend architecture (controllers, routes, middleware)** to improve scalability and maintainability.
- Optimized API performance and response time through efficient request handling and structured
- database queries.
- Managed source control and collaborative development workflows using **Git and GitHub**.

Tech Stack:

React Native, Node.js, Express.js, MongoDB, JavaScript (ES6+), JWT Authentication, REST APIs, OneSignal, Git

EDUCATION

Bachelor of Computer Science & Engineering | Rashtrasant Tukadoji Maharaj Nagpur University – 2023
